### 9 Supplementary material

Figure S1: Observed volume as compared with modelled volume (2010, wet year)

Figure S2: Observed volume as compared with modelled volume (1985, normal year)

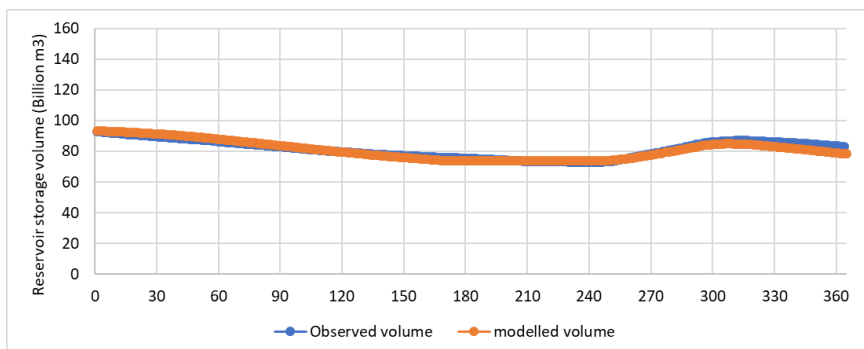

Figure S3: Observed volume as compared with modelled volume (2006, dry year)

11 *Table S1: Papers on climate change effects on runoff in the Volta basin. The first four papers are as reviewed by Roudier et*  
 12 *al., 2014 with the exception of the summary of the predictions*

Reference	Time period	Climate model	Hydrological model	Scenarios	Predictions
<b>Kunstmann and Jung, 2005</b>	2030-2040	ECHAM4-MM6	OSU-LSM	IS92a	Monthly changes: increase: May-June & Aug-Nov (range 20-55%) decrease: July (10%); Feb-May and Dec (20%-75%)  Annual trend: 18% increase in annual runoff
<b>Aerts et al., 2006</b>	2001-2099	ECBilt-CLIO-VECODE	STREAM	A2	Annual trend: 65% increase mean decadal runoff
<b>Jung et al., 2012</b>	2030-2039	ECHAM4-MM5	WaSIM	IS92a	Monthly changes: increase: Jun, Sept & Oct (range 15-30%) decrease: July & Aug (6-8%)  Annual trend: 4% increase in annual runoff
<b>McCartney et al., 2012</b>	2071/2100 2021/2050, 1983/2012	ECHAM4-MM5 HadCM3	SWAT and WEAP	A1B	Annual trend: 45% decrease in annual runoff
<b>Sood et al., 2013</b>	2021-2050 2071-2100	ECHAM5	SWAT	A1B	Annual trend: Decrease by 13% in water yield in 2021-2015 Decrease of 40% in 2071-2100
<b>Amisigo et al., 2015</b>	2010-2050	NCAR_CCSM3_0 A2 CSIRO_MK3_0 A2 NCAR_PCM1 A1b IPSL_CM4 B1	WEAP	A2 A1b B1	Inconsistent results across scenarios
<b>Jin et al., 2018</b>	1951-2100	CNRM-CM5 HadGEM2-ES CanESM2	INCA	RCP 8.5	Monthly changes: increase: wet season flow: June to Sept (10-50%) decrease: dry season months
<b>Abubakari, 2021</b>	2011-2040 2041-2070 2071-2100	CFSR	SWAT	A1B	Monthly changes: increase: February to August decrease: September to January  Annual trend: 12% increase in annual runoff

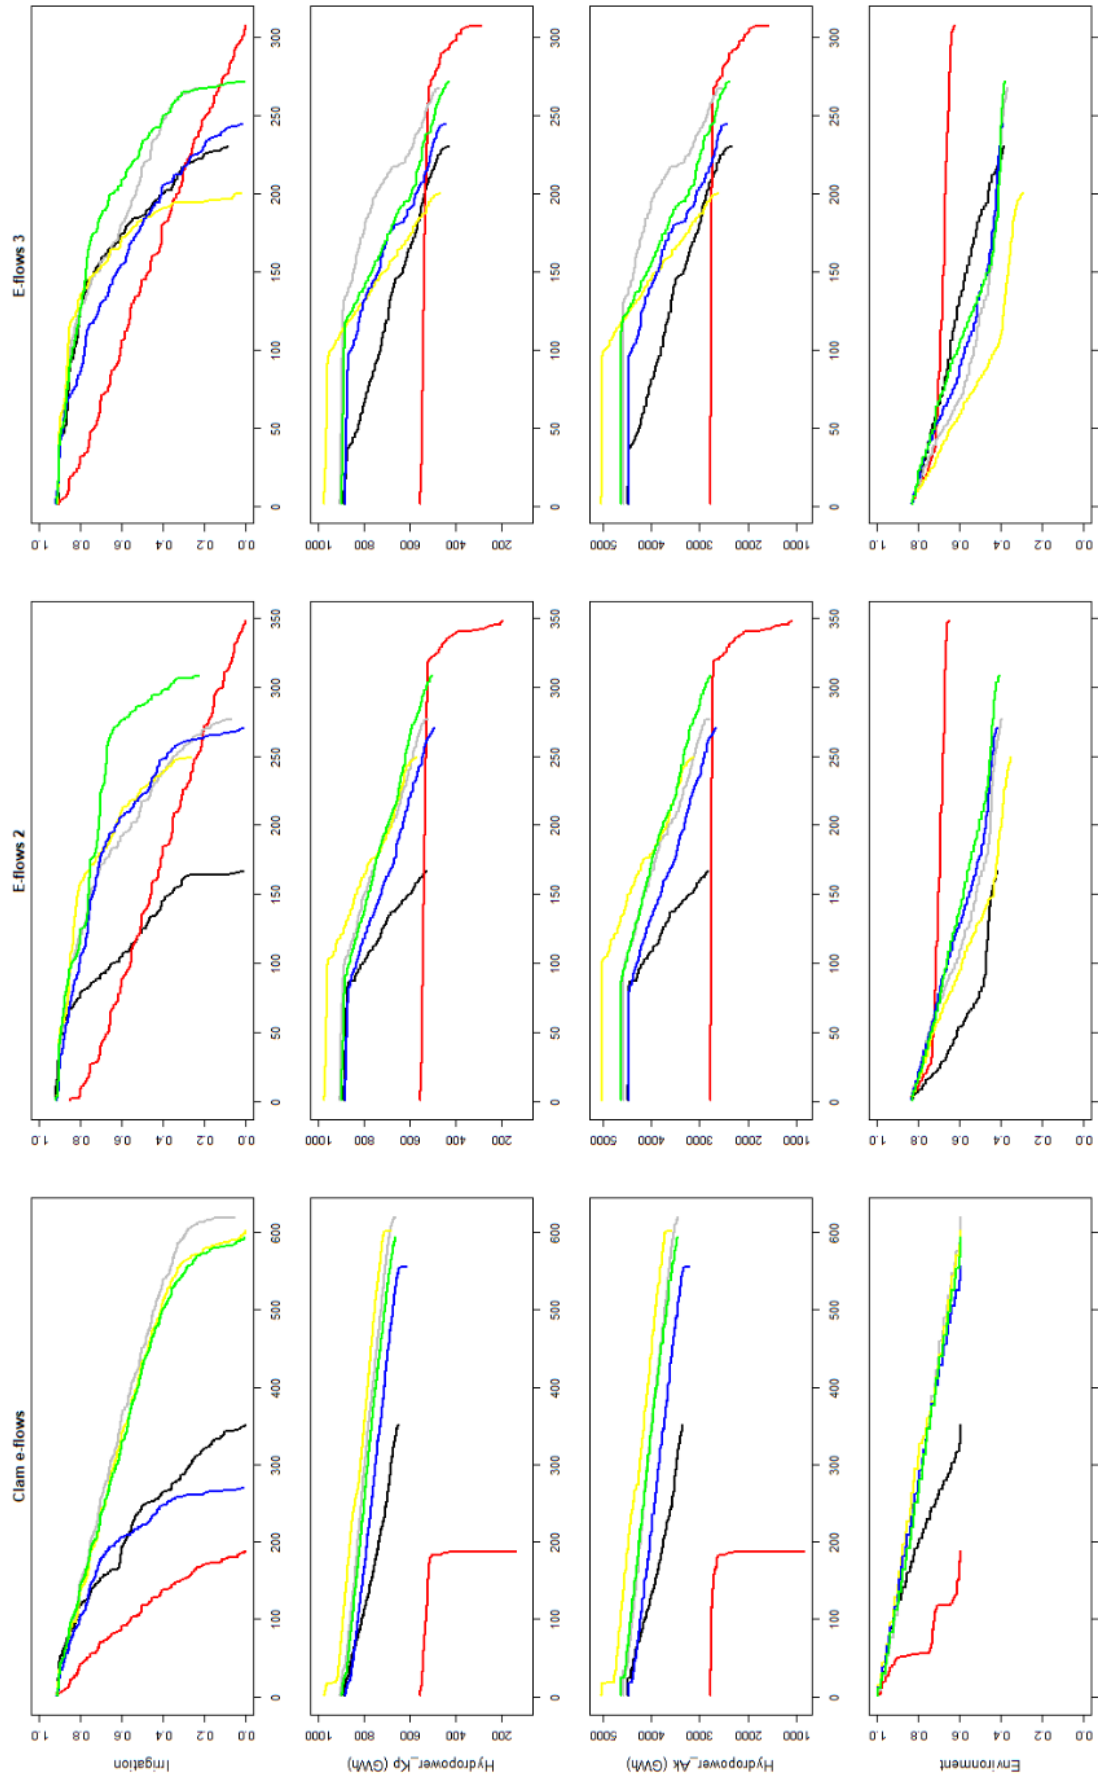

Figure S4: Cumulative distributive graphs showing the function values of all the non-dominated solutions for the baseline and future scenarios. Notation- scenarios: S1 to S5- Scenario 1 to 5, D- dry season flow, W- wet season flow
