Memorandum

To: Dr. Alberto Guadagnini, Editor of Hydrology and Earth System Sciences

Subject: Revision of Paper # hess-2022-372

Dear Editor:

Upon your recommendation, we have carefully revised Paper # hess-2022-372 entitled "A General Model of Radial Dispersion with Wellbore Mixing and Skin Effects".

Response to Editor:

While I do appreciate the prompt reply, the quality of English (also in the newly added sentences) is not sufficient. I would recommend a thorough revision along these lines.

[Reply: Thanks a lot. The English has been polished by two native speakers, Mohamed Hussein and James JS Yeanay Jr, who are mentioned in the Acknowledgements.](#)

If you have any further questions about this revision, please contact me.

Sincerely Yours,

Quanrong Wang, PhD, PG.

Professor and

Holder of Endowed CUG Scholar in Hydrogeology

A handwritten signature in black ink that reads "Quanrong Wang". The signature is written in a cursive, flowing style.
