

Dear Editor,

We would again like to thank you for handling our paper and giving additional advice. The previous two letters describe in detail all the changes that we made in the last two revisions (minor and major). The only additional change we made to produce the final manuscript was adding page numbers. Additionally, according to the manuscript guidelines, we removed all tables and figures from the main text. The figures are now only included in the separate zip file. The figure captions are sequential at the end of the manuscript. The tables and their captions are included after the figure captions. We have tested all the figures with a color-blind lens and do not believe that they pose major problems.

Please refer to the point-by-point revisions and the marked-up track changes from the rounds of minor and major revisions if necessary to follow the previous modification.

On behalf of all authors,

Natalie Ceperley
