

Referee #1:

accepted as is

We thank the referee for the positive valuation.

Referee #2:

- Line 430: "this this".

Thank you. Done.

- The new figure describing expected responses is excellent and improves the section greatly.

Thank you for the suggestion to include such a figure and for the positive feedback.

- The responses to my other previous comments are also satisfactory.

Thank you for the positive reply.

- The conclusion and summary section is 2 pages long, if possible, try to narrow this down to the key points to be more concise, as there is a lot of information that is more reminiscent of a discussion section rather than a conclusion. I believe aiming for about 1 page total would be good-

We agree. We moved the discussion of the questions raised in the introduction to the discussion section 3.4 and slightly adapted the conclusions section 4 (which is now less than 1 page).

In addition, we made a few minor changes to the manuscript (see tracked version)

Editorial assistant:

Checking your paper, I noticed that your table 2 contains coloured cells. Please note that this will not be possible in the final revised version of the paper due to HTML conversion of the paper. When revising the final version, you can use footnotes or italic/bold font. For now, the process will continue, but please note that the final version cannot be published by using coloured tables.

We reformatted the red numbers into black, bold numbers.
