Comments on hess-2023-55-manuscript-version5

Thank you so much for considering all revisions that were proposed.

There are still few minor revisions required:

1) Abstract (line 17): Please consider changing "78 models" by "78 model simulations", since you are not using 78 distinct models.
2) Lines 173 and 388: The acronym "MCGs" should be replaces by GCMs.
3) Tables 3-6: Please check the acronym: SDS. Shouldn't this be WSD? Please also check that Maximum, Median and Minimum are all starting with Capital Letters.
4) Equation 3: Please check this equation. It does not seem to be correct.
5) Equations 4 to 8: Please use the standard notation for the sample means with the bar line at the top: Example: $\bar{X}_i$
6) References: This reference is cited incorrectly: https://rmets.onlinelibrary.wiley.com/doi/10.1002/joc.2168
   Please check the citations in the text.
