

Dear Harrie-Jan Hendricks Franssen

Thank you for the time invested in our paper, and for taking care of its acceptance. We hope that we have uploaded all the needed files.

We added two insignificant updates in the text:

1. Instead of "solid lines represent cell-wise power calculation $\backslash(P_{\text{total}}\backslash)$, while the dashed lines represent power, calculated based on the parallel channels model $\backslash(P^{\text{EQ}}_{\text{total}}\backslash)$ ", it is now "unmarked lines represent cell-wise power calculation $\backslash(P_{\text{total}}\backslash)$, while the lines marked with circle markers represent power, calculated based on the parallel channels model $\backslash(P^{\text{EQ}}_{\text{total}}\backslash)$ ". This change appears twice in pp. 28-29. I adjusted plots to be COBLIS-compatible in the previous revision but missed the description in the text.
2. Code and data availability: Instead of "A dedicated repository, containing all codes and data, will be created on GitHub" it is now "Codes and data are available on a dedicated GitHub repository upon request from Evgeny Shavelzon (eshavelzon@campus.technion.ac.il)".

Best
Evgany and Yaniv
