Hydrology and Earth System Sciences (HESS)

Subject: Cover Letter for Manuscript Submission- "Towards a Robust Hydrologic Data Assimilation System for Hurricane-induced River Flow Forecasting"

Dear Dr. Lelys Bravo de Guenni

With this letter, I would like to acknowledge the resubmission of the revised manuscript.

Thank you again for your comments and suggestions. We have carefully revised the manuscript and added three appendices to provide further details on the technical aspects of the proposed approach, its implementation process, and how different sources of uncertainty are accounted for. These sections have been completely rewritten to ensure clarity and originality.

We hope that the revised manuscript is now suitable for publication in HESS.

Sincerely,

Peyman Abbaszadeh, Ph.D.
Assistant Professor
Hydrologic Modeling and Assimilation Lab
Department of Civil & Environmental Engineering
