

HESS-2024-373: Assessing deficiencies in remotely sensed actual evapotranspiration (AET): introducing AET signatures.

Editor's comment	Author's response
It was a very small change: Below Equation 5, two more equations appeared in the new version, which have no equation numbers. Please also add equation numbers there, although they are not signatures.	As per editor's suggestion, the two equations below equation 5 have now been numbered as 5a and 5b, as they are sub-equations of equation 5.
